

Induction Gate

The Shank's® Induction Gate is a heavy duty metal frame gate designed to be used as a crowding gate during sedation/induction of a horse. The gate is available in two models – **Recessed and Surface Mount**. Standard gate size is 48" high x 84" long (122cm x 213cm), but custom sizes can be requested.

Models

- **Recessed** (Requires a constructed cavity in the wall that is approximately 5" deep x 52" high x 86" long (13 cm x 132 cm x 218 cm) to receive the gate. See sketch below right.
- **Surface Mount**

Recessed

- 2" square tube frame
- 14 ga. sheet metal covering on both sides
- Includes one affixed D-ring
- Requires 5" deep x 52" high x 86" long cavity to receive gate (13cm x 132cm x 218cm)
- Includes angle iron header for cavity
- Includes square tube structural support for gate anchor point

Surface Mount

- 2" square tube frame
- 14 ga sheet metal covering on both sides
- Includes one affixed D-ring
- Recommended placement is approximately 28" (71cm) from corner

Optional custom features

- Custom size
