

Foal Table

The Shank's® Foal Table is designed for surgery on foals weighing up to 500 lbs. The simple hydraulic foot pump allows for operation of the table without being connected to electrical power.

Technical Specifications

- 30" x 60" lateral surface (76cm x 152cm)
- Affixed padding approximately 2" thick (5cm) – gray in color
- 6" swivel casters (2 rigid, 2 swivel with brakes)
- Hydraulic foot pump (see photos opposite)
- Hot dip galvanized/painted structural frame
- Lowered height 14-1/2" (37cm)
- Raised height 47" (119cm)
- Rated for 500 lbs. (227 kg)

Optional Features (Hydraulic System and operation) – See Photo Below

- Self-contained power unit with hand control push button solenoid pendant (available 110V/60 cycle or other power configurations for international use)
- A table built with this optional hydraulic system requires access to power for operation. A simple UP and DOWN function on the hand pendant controls operation of the table.
