

Small Ruminant Table

The Shank's® Small Ruminant Table is designed for surgery on goats, sheep and other small ruminants weighing up to 1,000 lbs.

Technical Specifications

- 24" x 84" lateral surface (61cm x 213cm)
- Affixed padding (approximately 2"/5cm thick) – gray in color
- 6" swivel casters (2 rigid, 2 swivel with brakes)
- Self-contained power unit with hand control push button solenoid pendant (available 110V/60 cycle or other power configurations for international use) – see photo below
- Halter ties at various locations
- Hot dip galvanized/painted structural frame
- Lowered height 15" (38cm)
- Raised height 47" (119cm)
- Rated for 1,000 lbs. (454 kg)

Optional Table Top Size

- Table top can also be 32" x 72" (81cm x 183cm)

Hydraulic System and Operation

The Table is user friendly and merely requires access to power for operation. A simple UP and DOWN function on the hand pendant controls operation of the table. The table can be stopped at any position during raising and lowering.
